Software Release Notes

Part Number: SW90216
Description: Oztek Power Studio
Release Number: 3.3
Release Date: 2/7/2019
Revision: A

New Features:

- Display communication or data error when a register cannot be read on Dashboard and Instrumentation tabs
- Display progress bar when accessing configuration
- Add support for "set real time clock" command button if a product supports using it
- Added CRC checks for Modbus messages

Bug Fixes:

- Fixed an issue when using multiple targets where switching targets would enable the controls when disconnected
- Fixed additional issues that prevented reading some data logs on targets that support those features
- Fixed bug where the fault log count register was polled even after switching away from the data logging tab

Compatibility Notes:

- N/A
